Instant Pip Profit

- **For Buy** To Enter (UPTREND)

  1. Look for the currency pair to hit or come very close to hitting the lower Bollinger.

  2. Wait for the next candle to Make sure it is a white candle which indicates bullishness .**RSI and CCI should go up.(Optional)**
  Stockhastic should be at bottom. Parabolic Sar should preferably be below Price. If so, go long at the open of the third candle. Exit when it reaches the upper Bollinger.

  3. The initial stop is placed at the first candle's low OR 100 Pips below the buy entry price whichever is lower.

-

Pip Maximizer
(Works Best With Daily Chart)

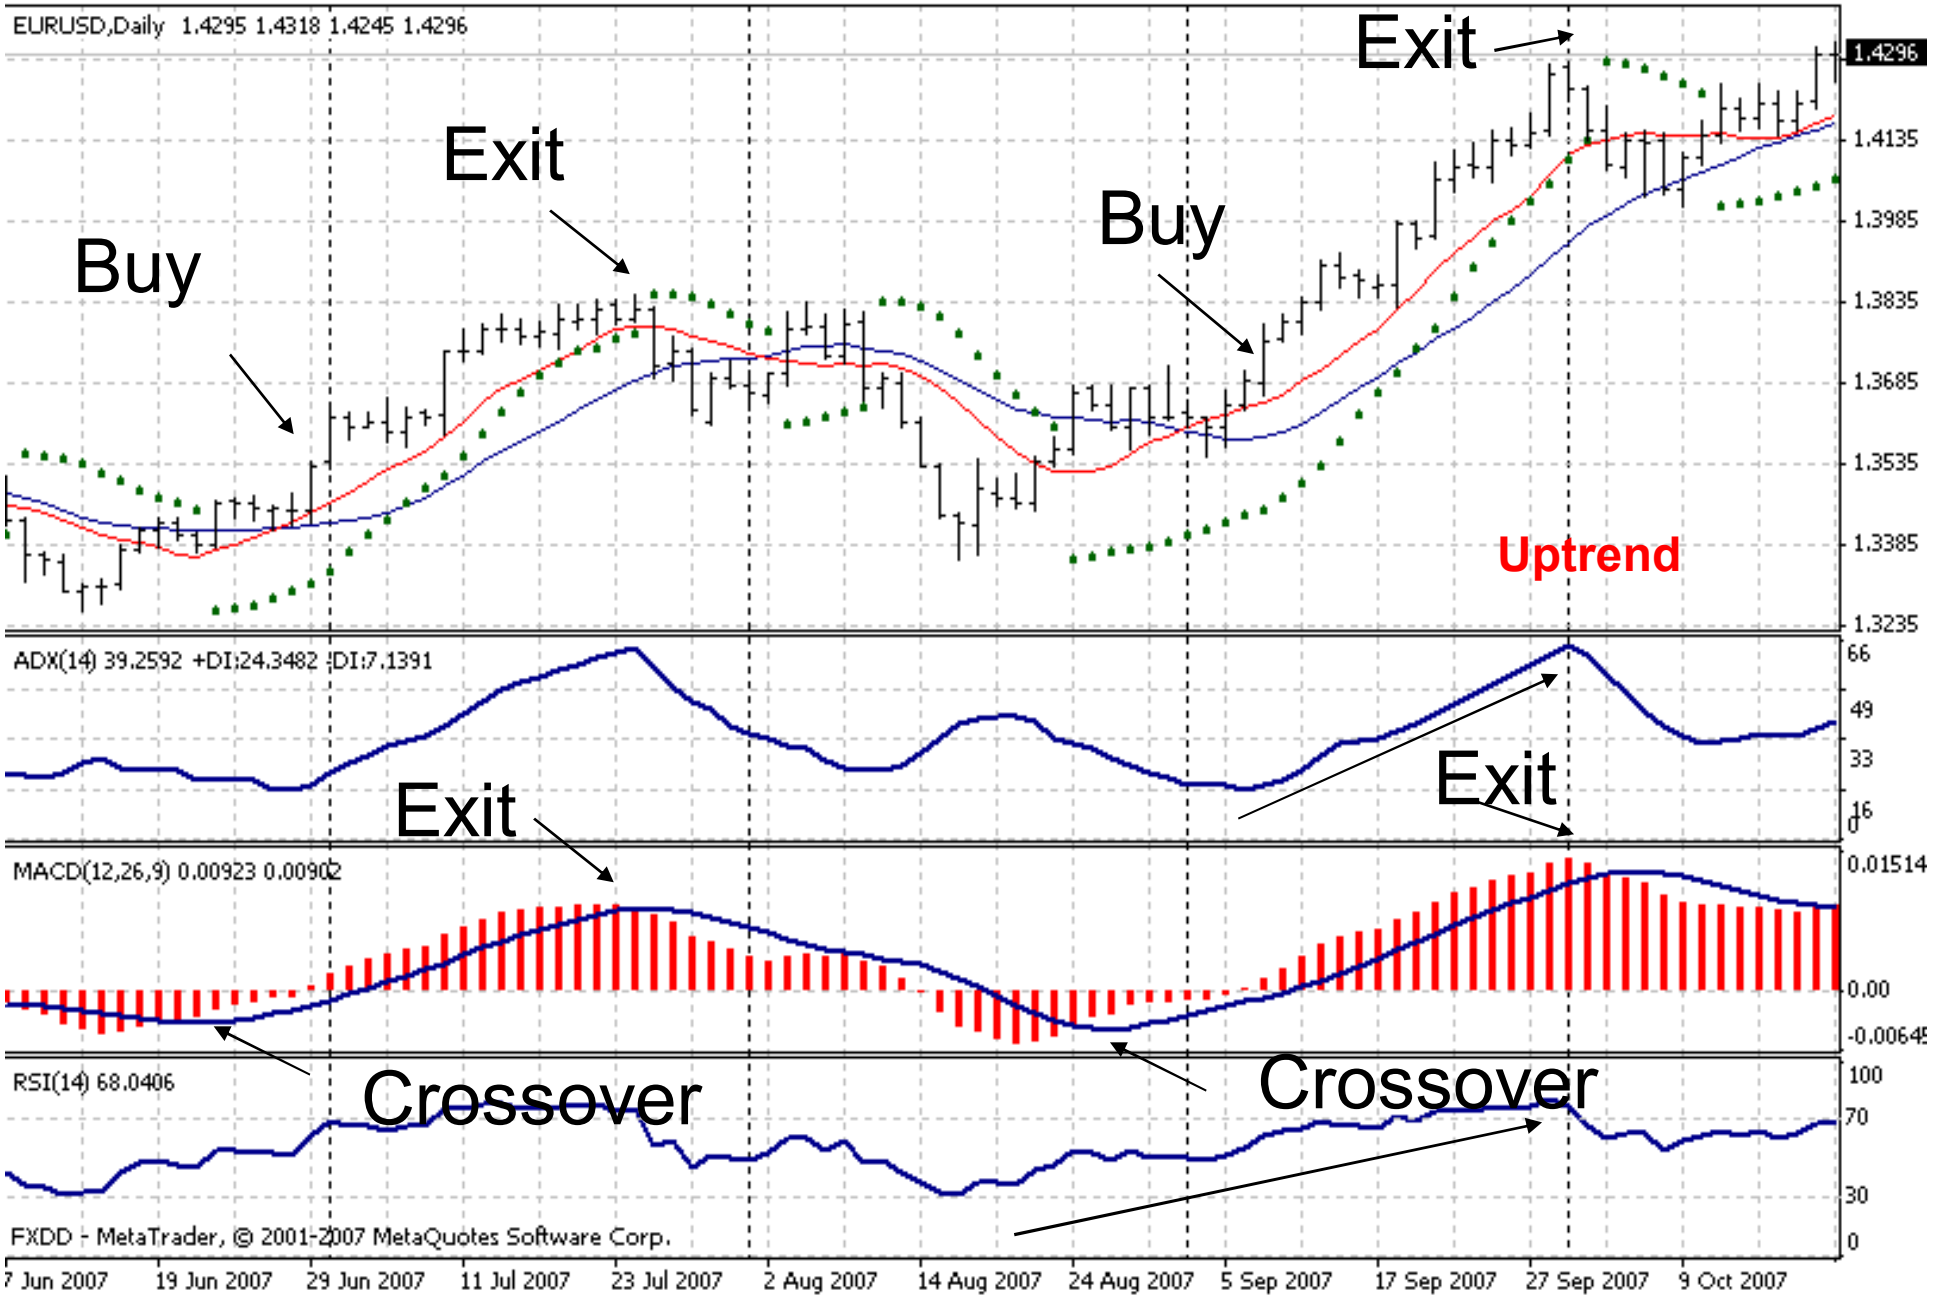

Copyright Powerup Capital Pte
Ltd

Cutting through the MA

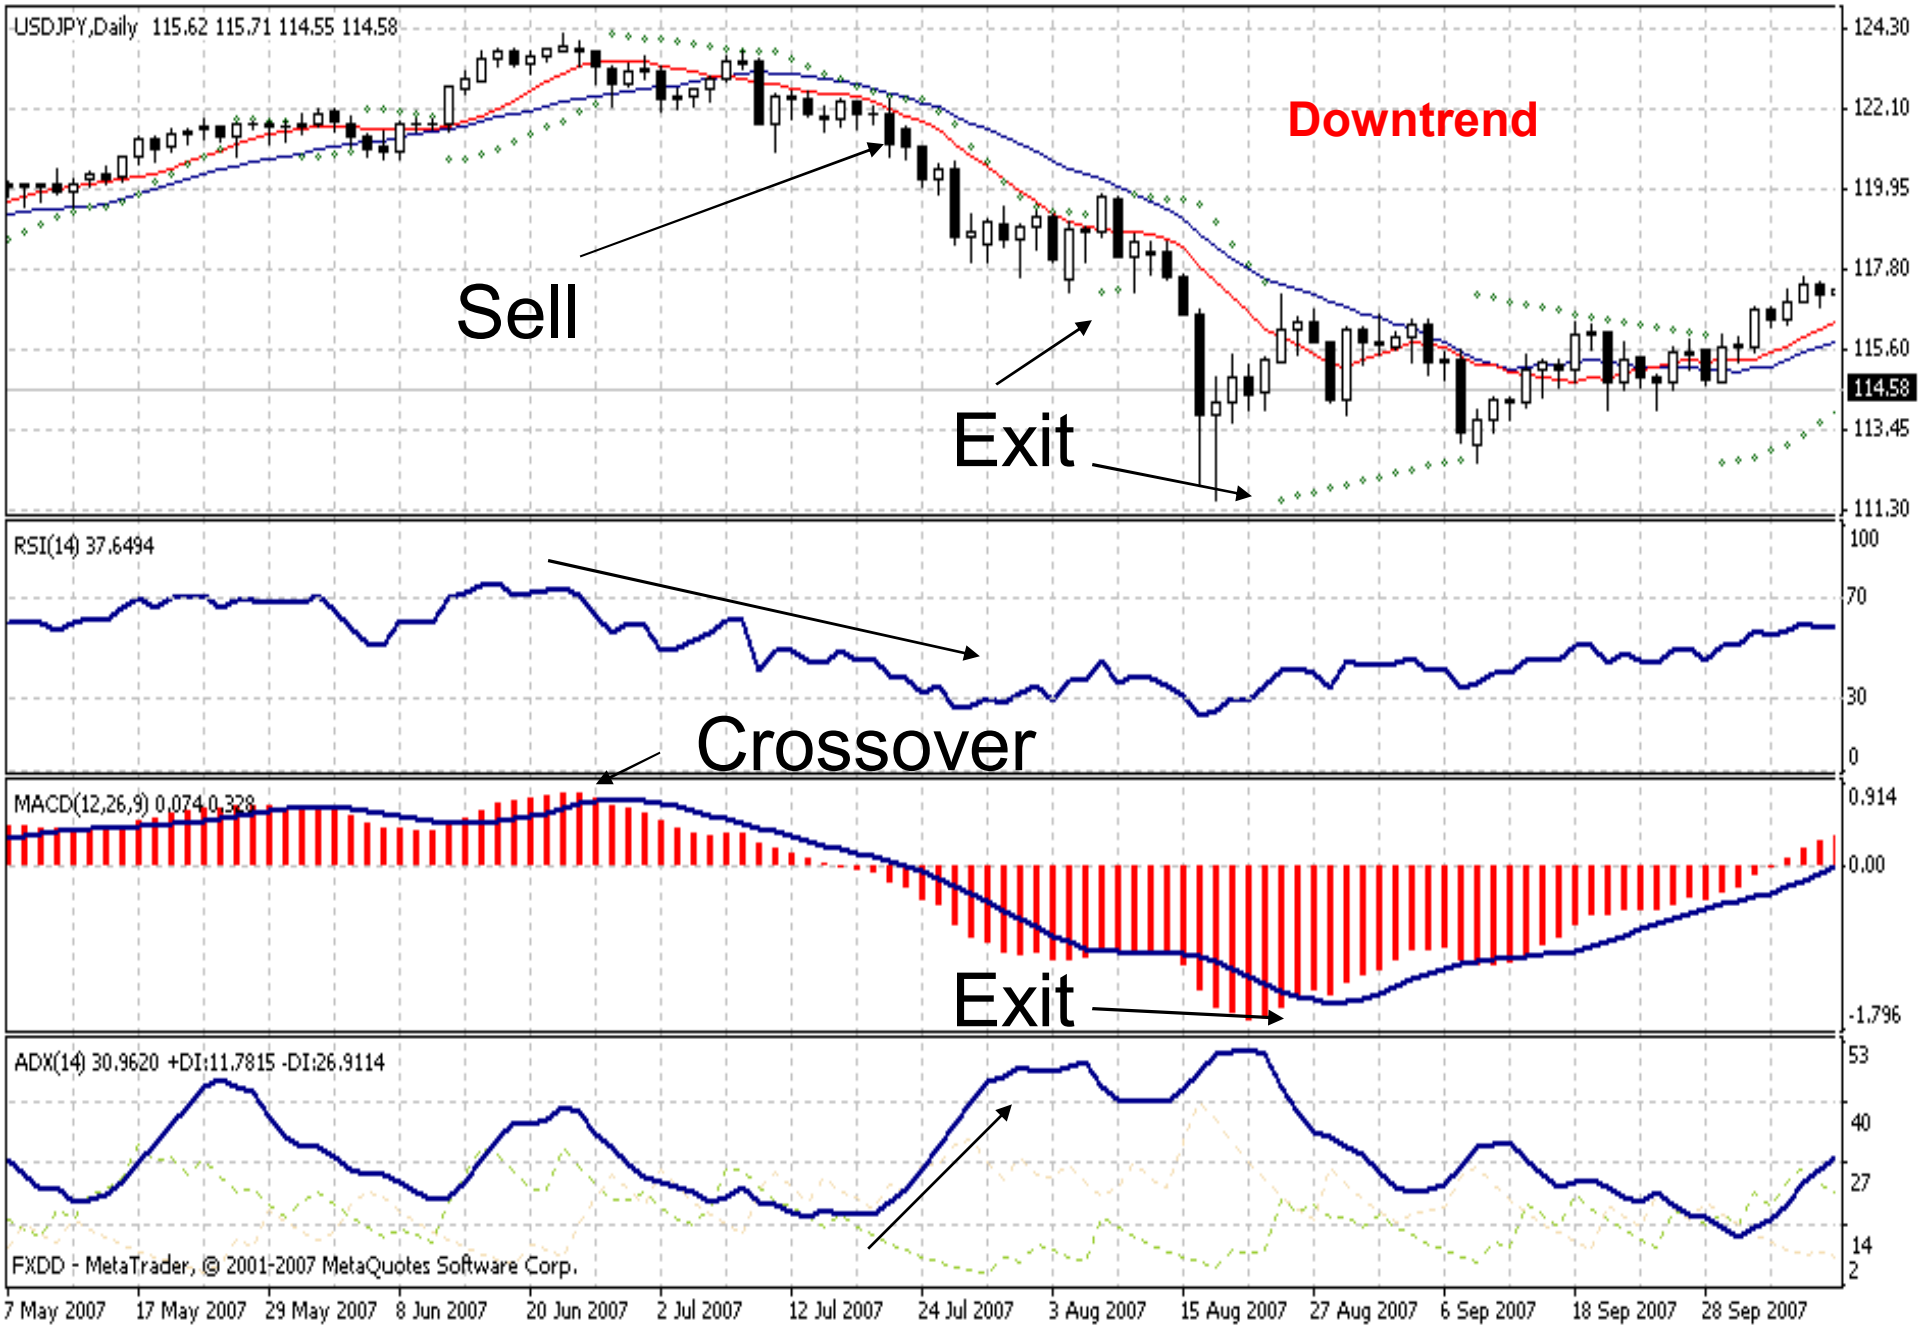

- You can enter the market when current market value cuts through a simple moving average i.e 10MA & 20MA after both the MA does a crossover.
- If the market value cuts through the moving average from below: Place a buy market order (Make sure the MA is going up)
- If the market value cuts through the moving average from above: Place a sell market order (Make sure the MA is going down)
- Make sure ADX is going up whether buying or selling.
- If buying RSI should go up , If Selling RSI should go down
- To confirm entry and exit use MACD crossover and Parabolic SAR
- Set Stoploss atleast 100 -150 pips below or above your entry or 2% of your capital whichever is higher. Set a trailing stop order at 10/15 pip intervals

Pip Retracement

Copyright Powerup Capital Pte Ltd

Watch for the retracements

- Time frame :15 mins/ 30 mins /1 hour/ 4 hours / daily chart
- Place a buy market order as you see a bullish candle moving away from the Simple Moving Average overlaid on the chart. Make sure trend of MA and price is up.
- Place a Sell market order as you see a bearish candle moving away from the Simple Moving Average overlaid on the chart. Make sure trend of MA and price is down.
- Use additional indicators like MACD Crossover , RSI and Parabolic Sar for Entry and Exit.
- Set Stoploss atleast 100 -150 pips below or above your entry or 2% of your capital whichever is higher. Put in a 10/ 15 pips trailing stop together with order.

Copyright Powerup Capital Pte Ltd

Watch for the retracements

- **Buy**

1)Price should retrace to MA for support

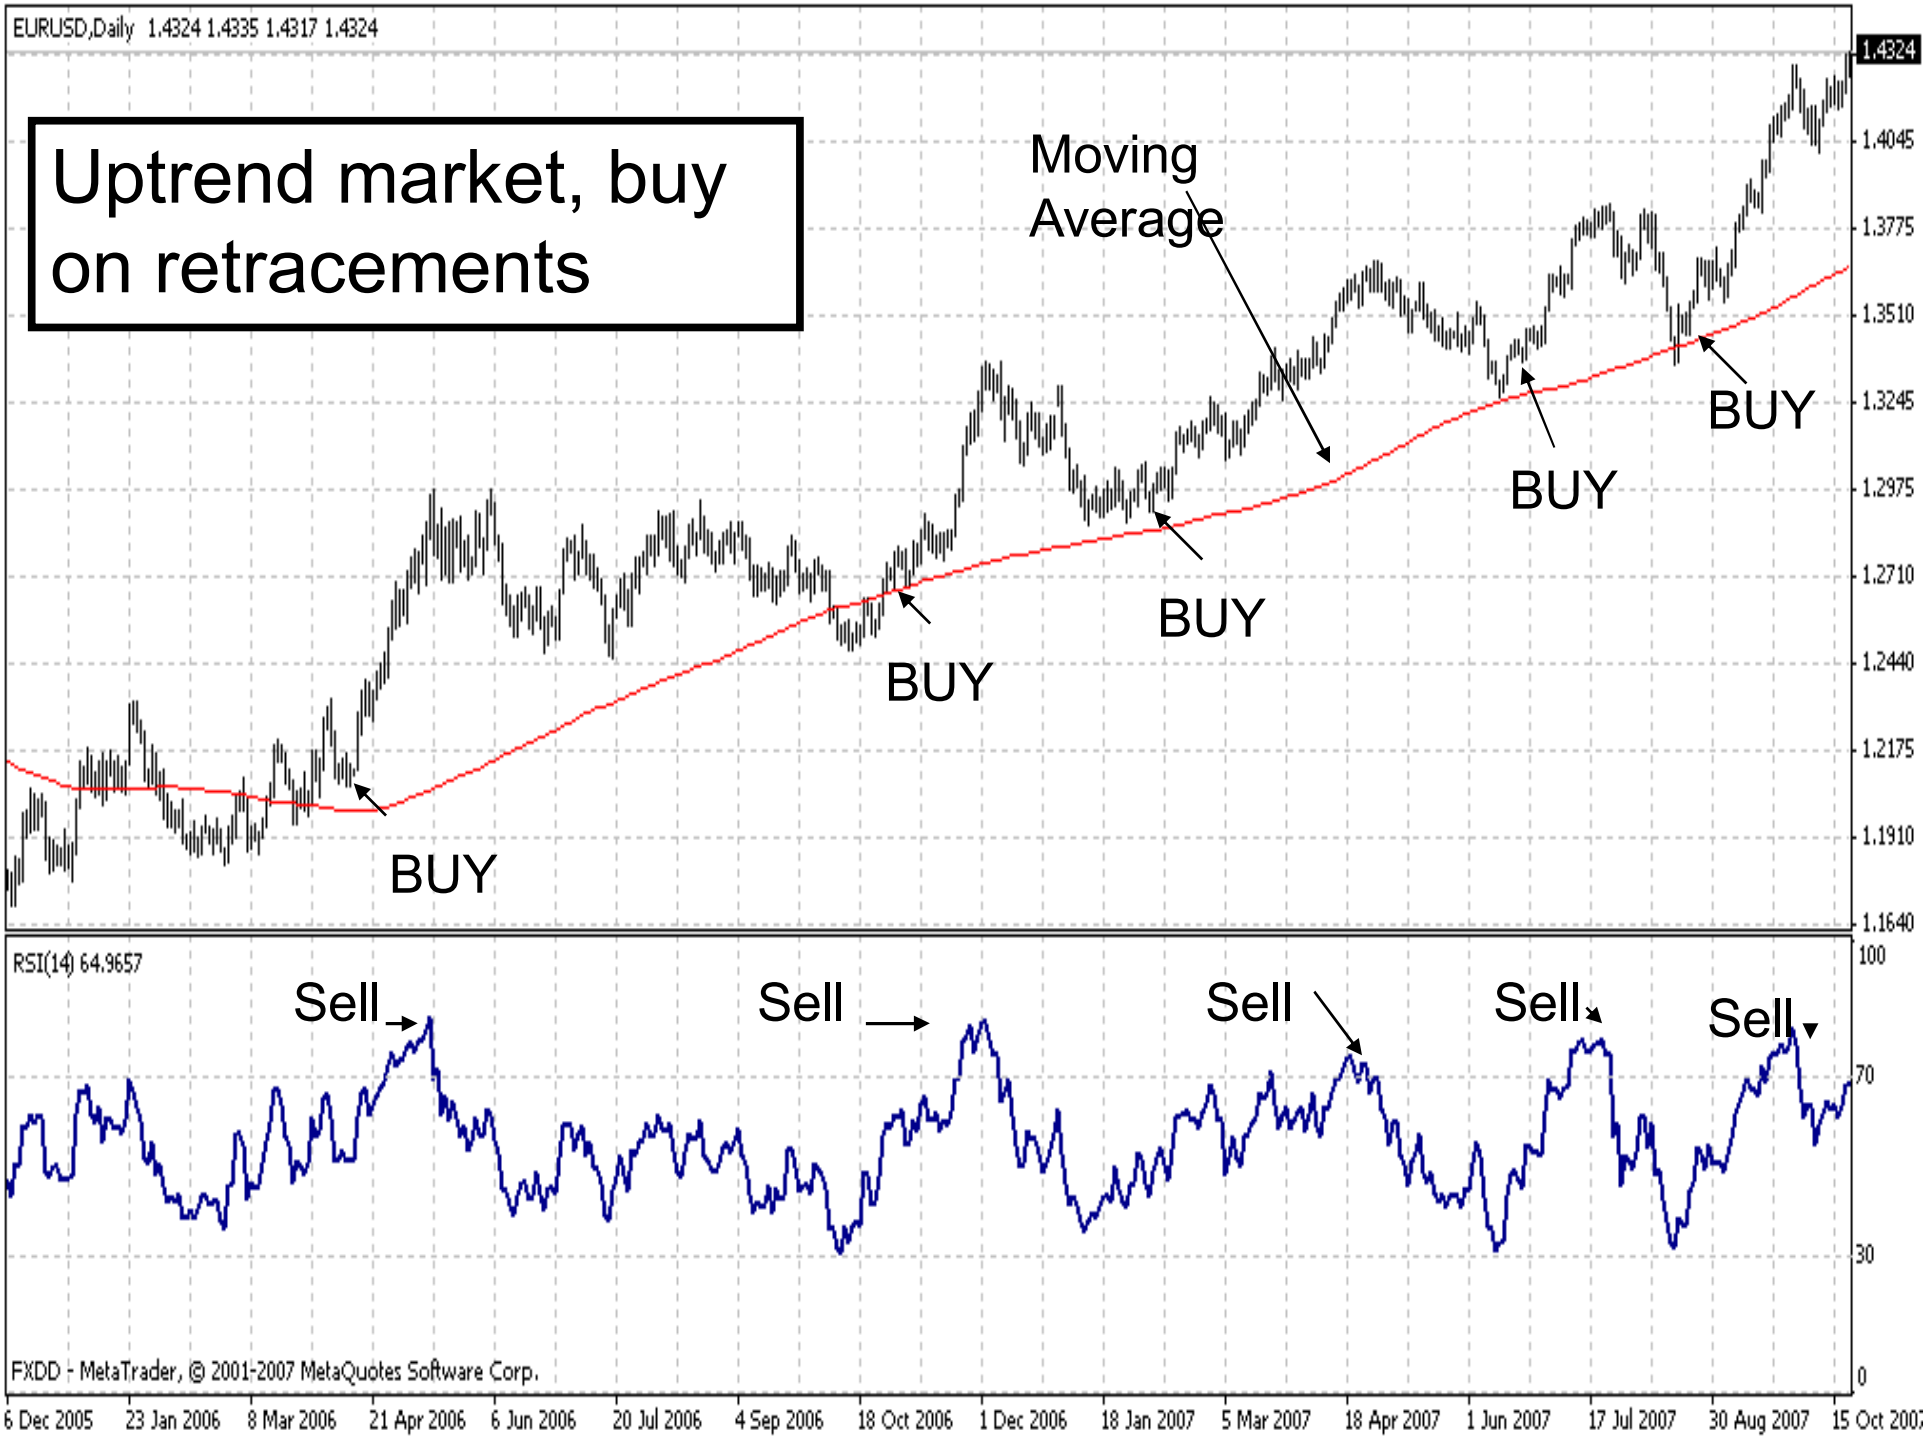

2) MA should go up & Parabolic Should be below price

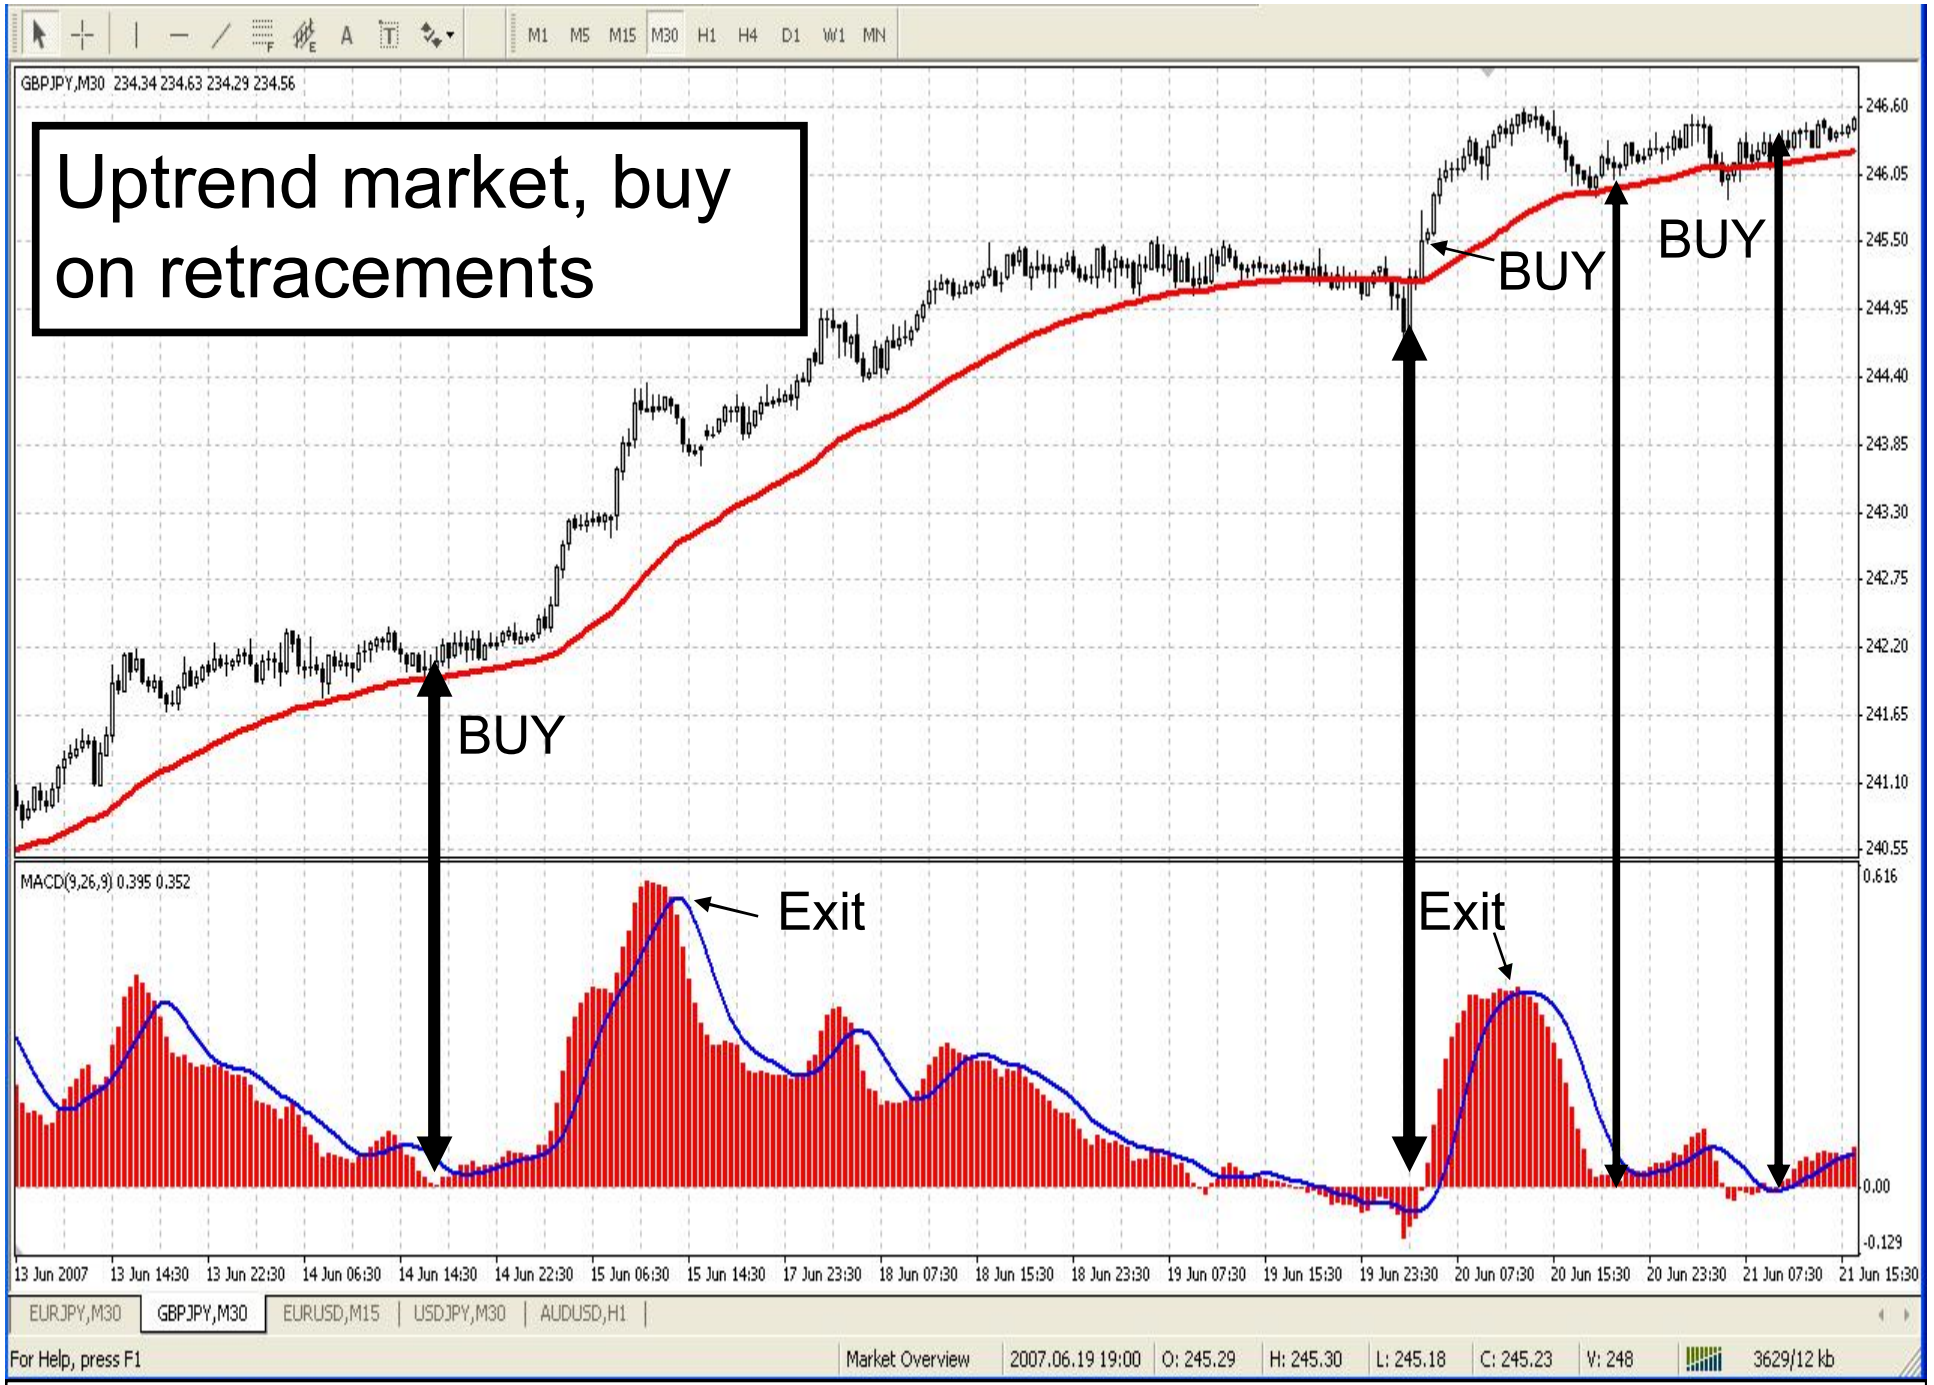

3) Exit when Parabolic Sar goes above price and there is Macd Crossover at the top .

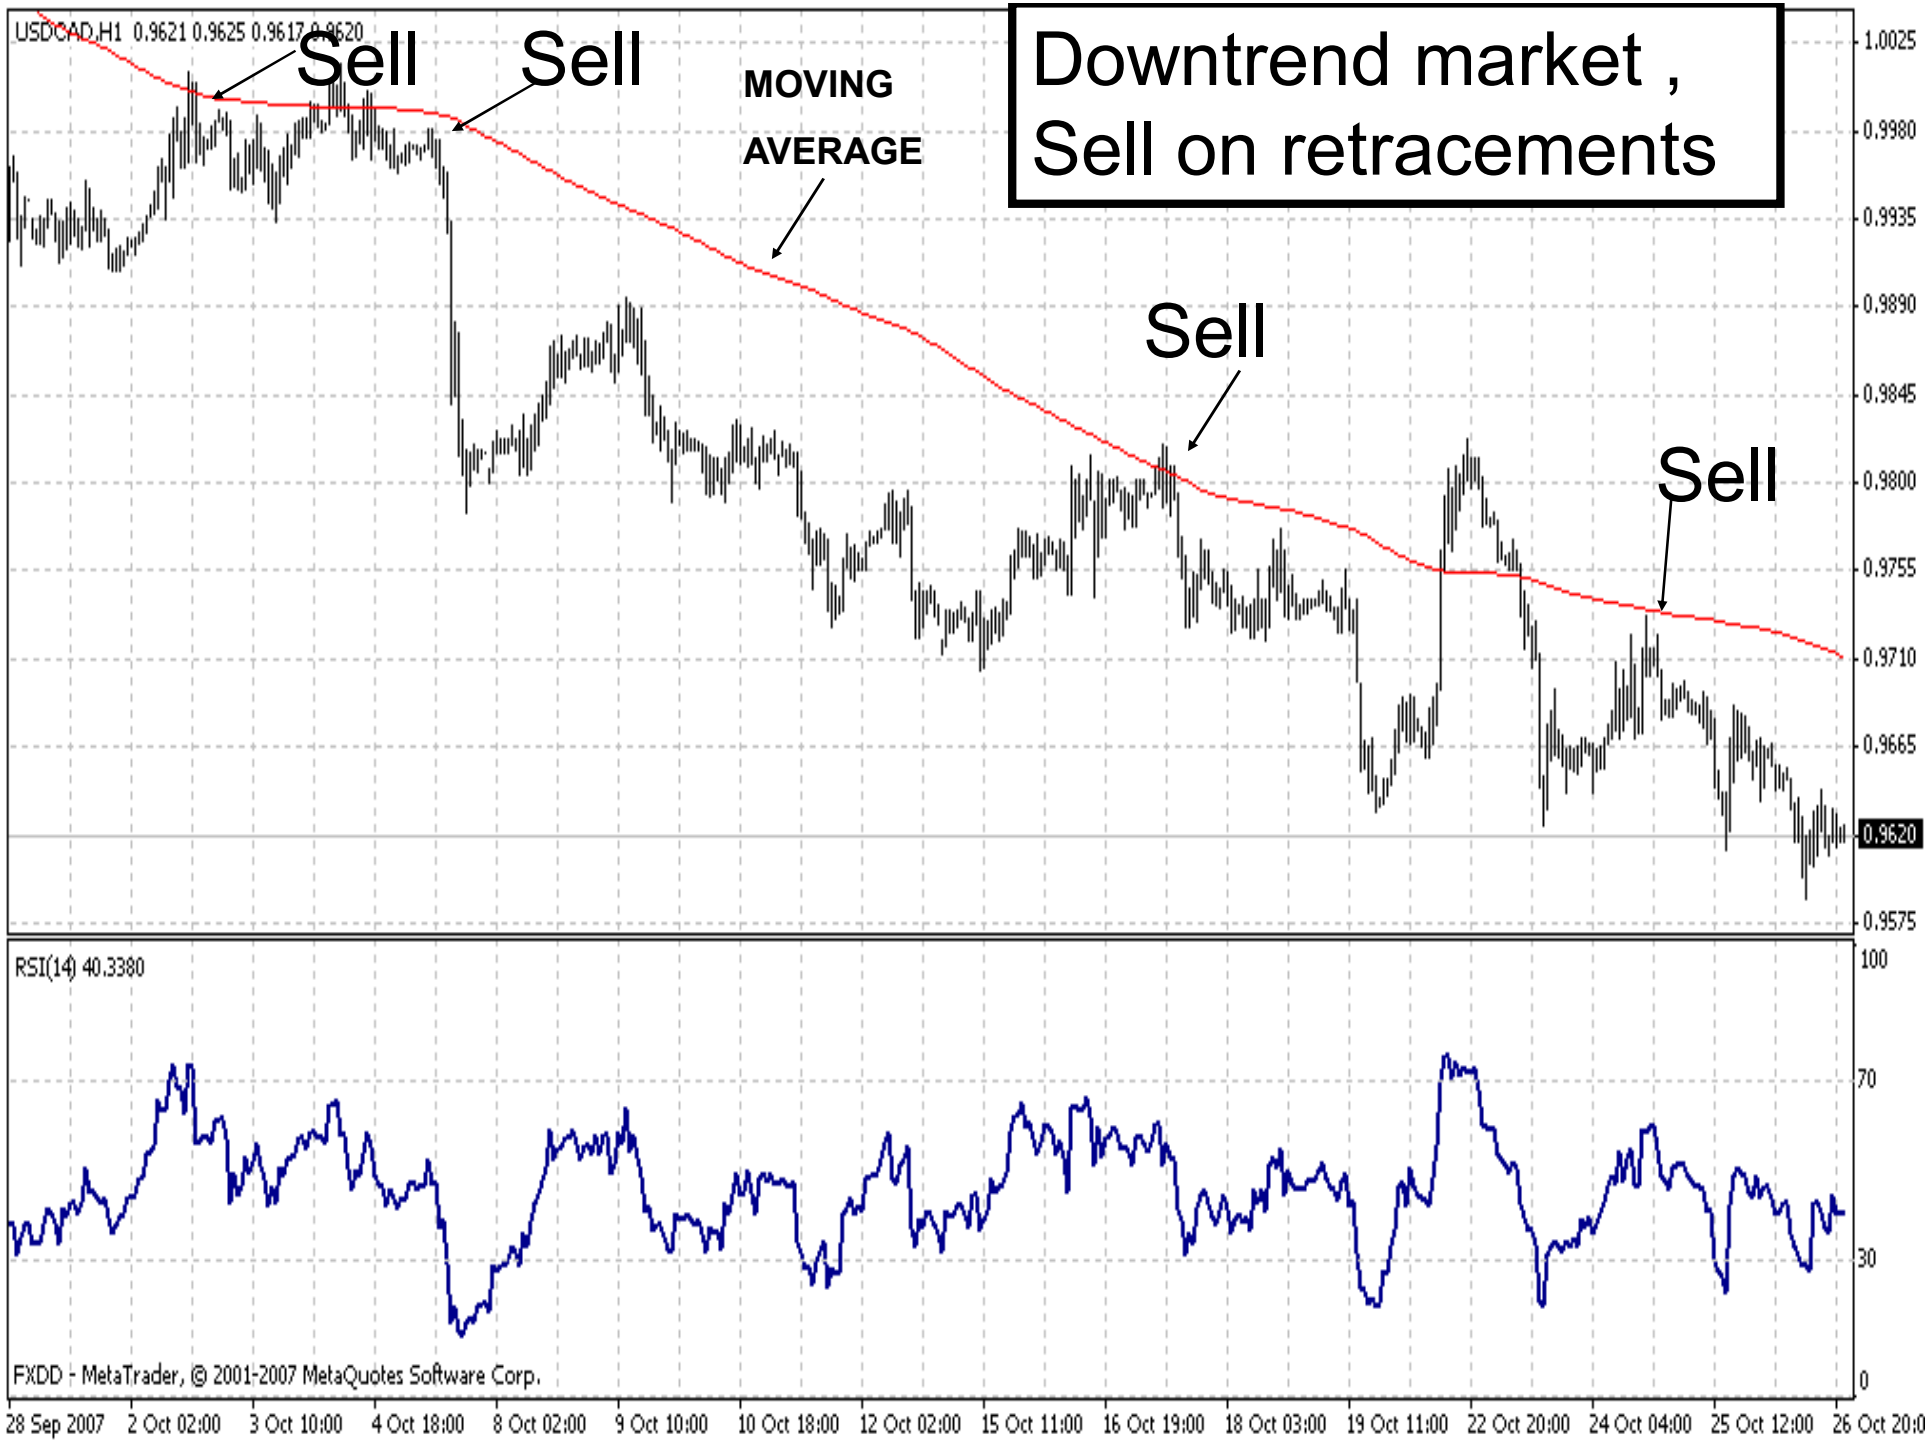

- **Sell**

1) Price should retrace to MA encounter resistence
2) MA should go down & Parabolic should be above price
3) Exit when Parabolic Sar goes below price and there is MACD Crossover at the bottom.

Pip Divergence

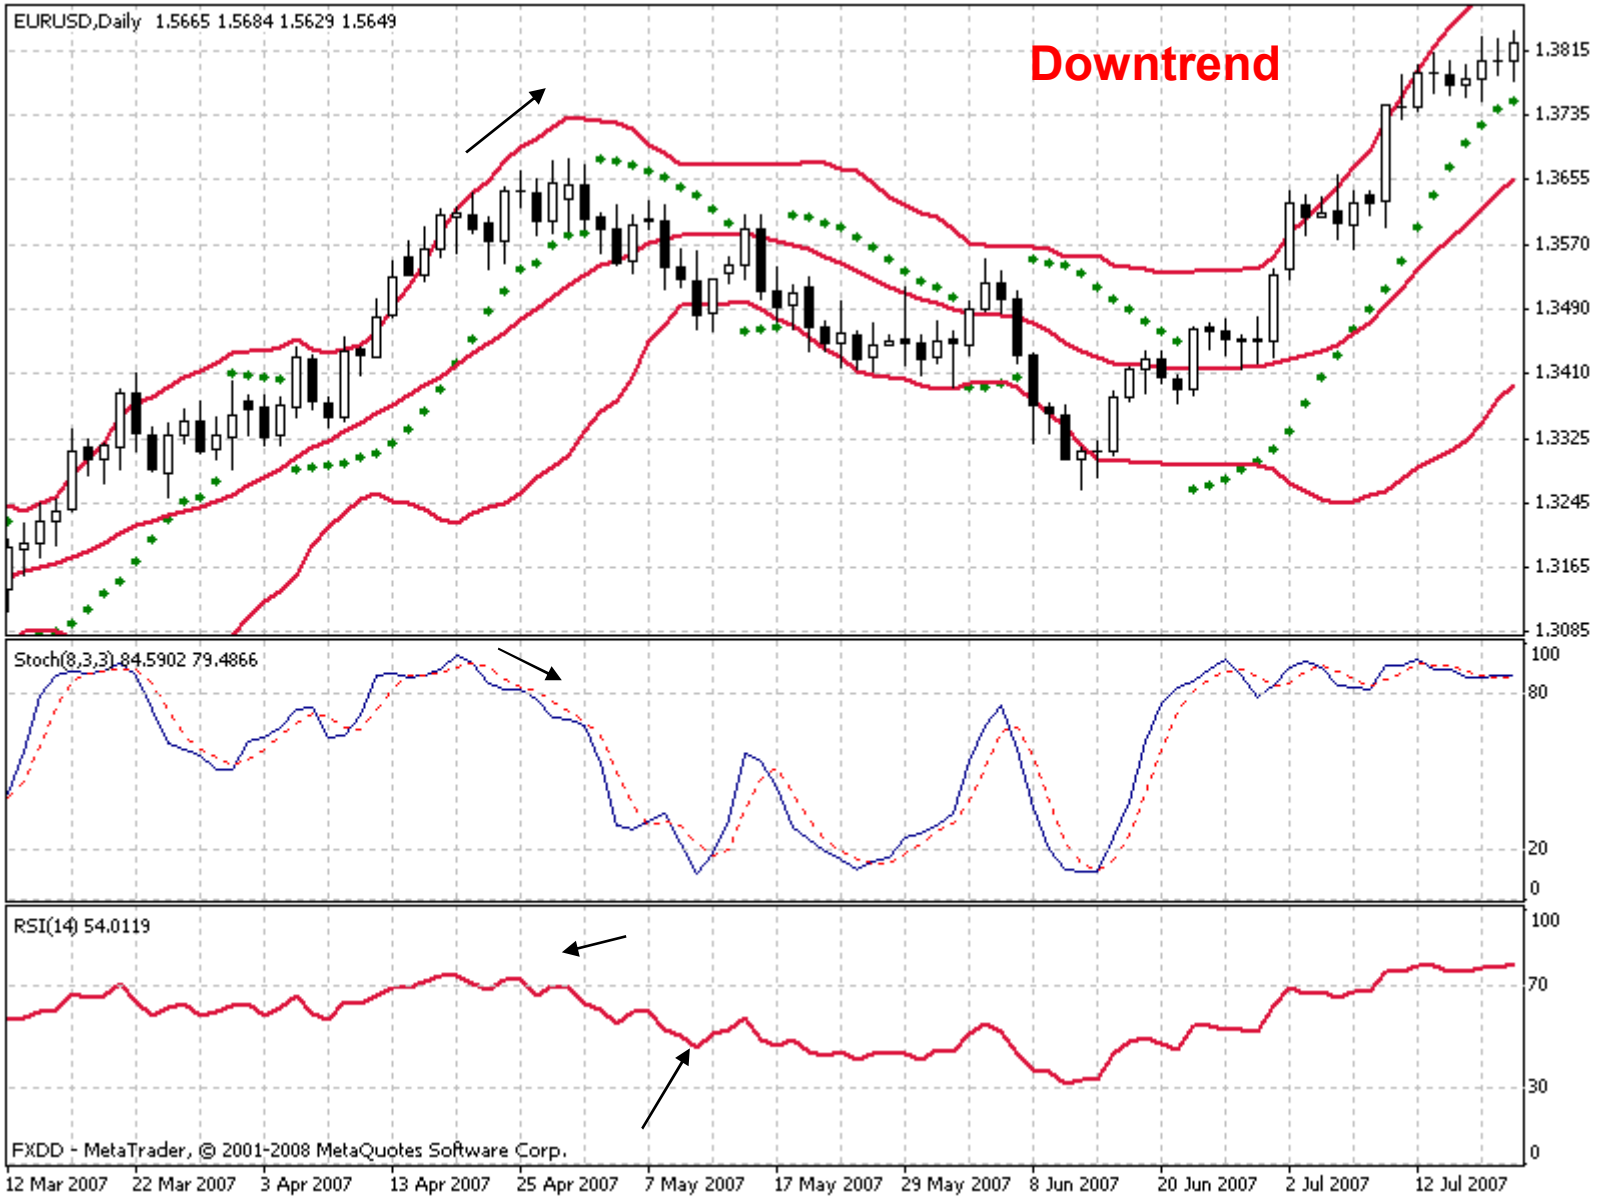

Copyright Powerup Capital Pte Ltd

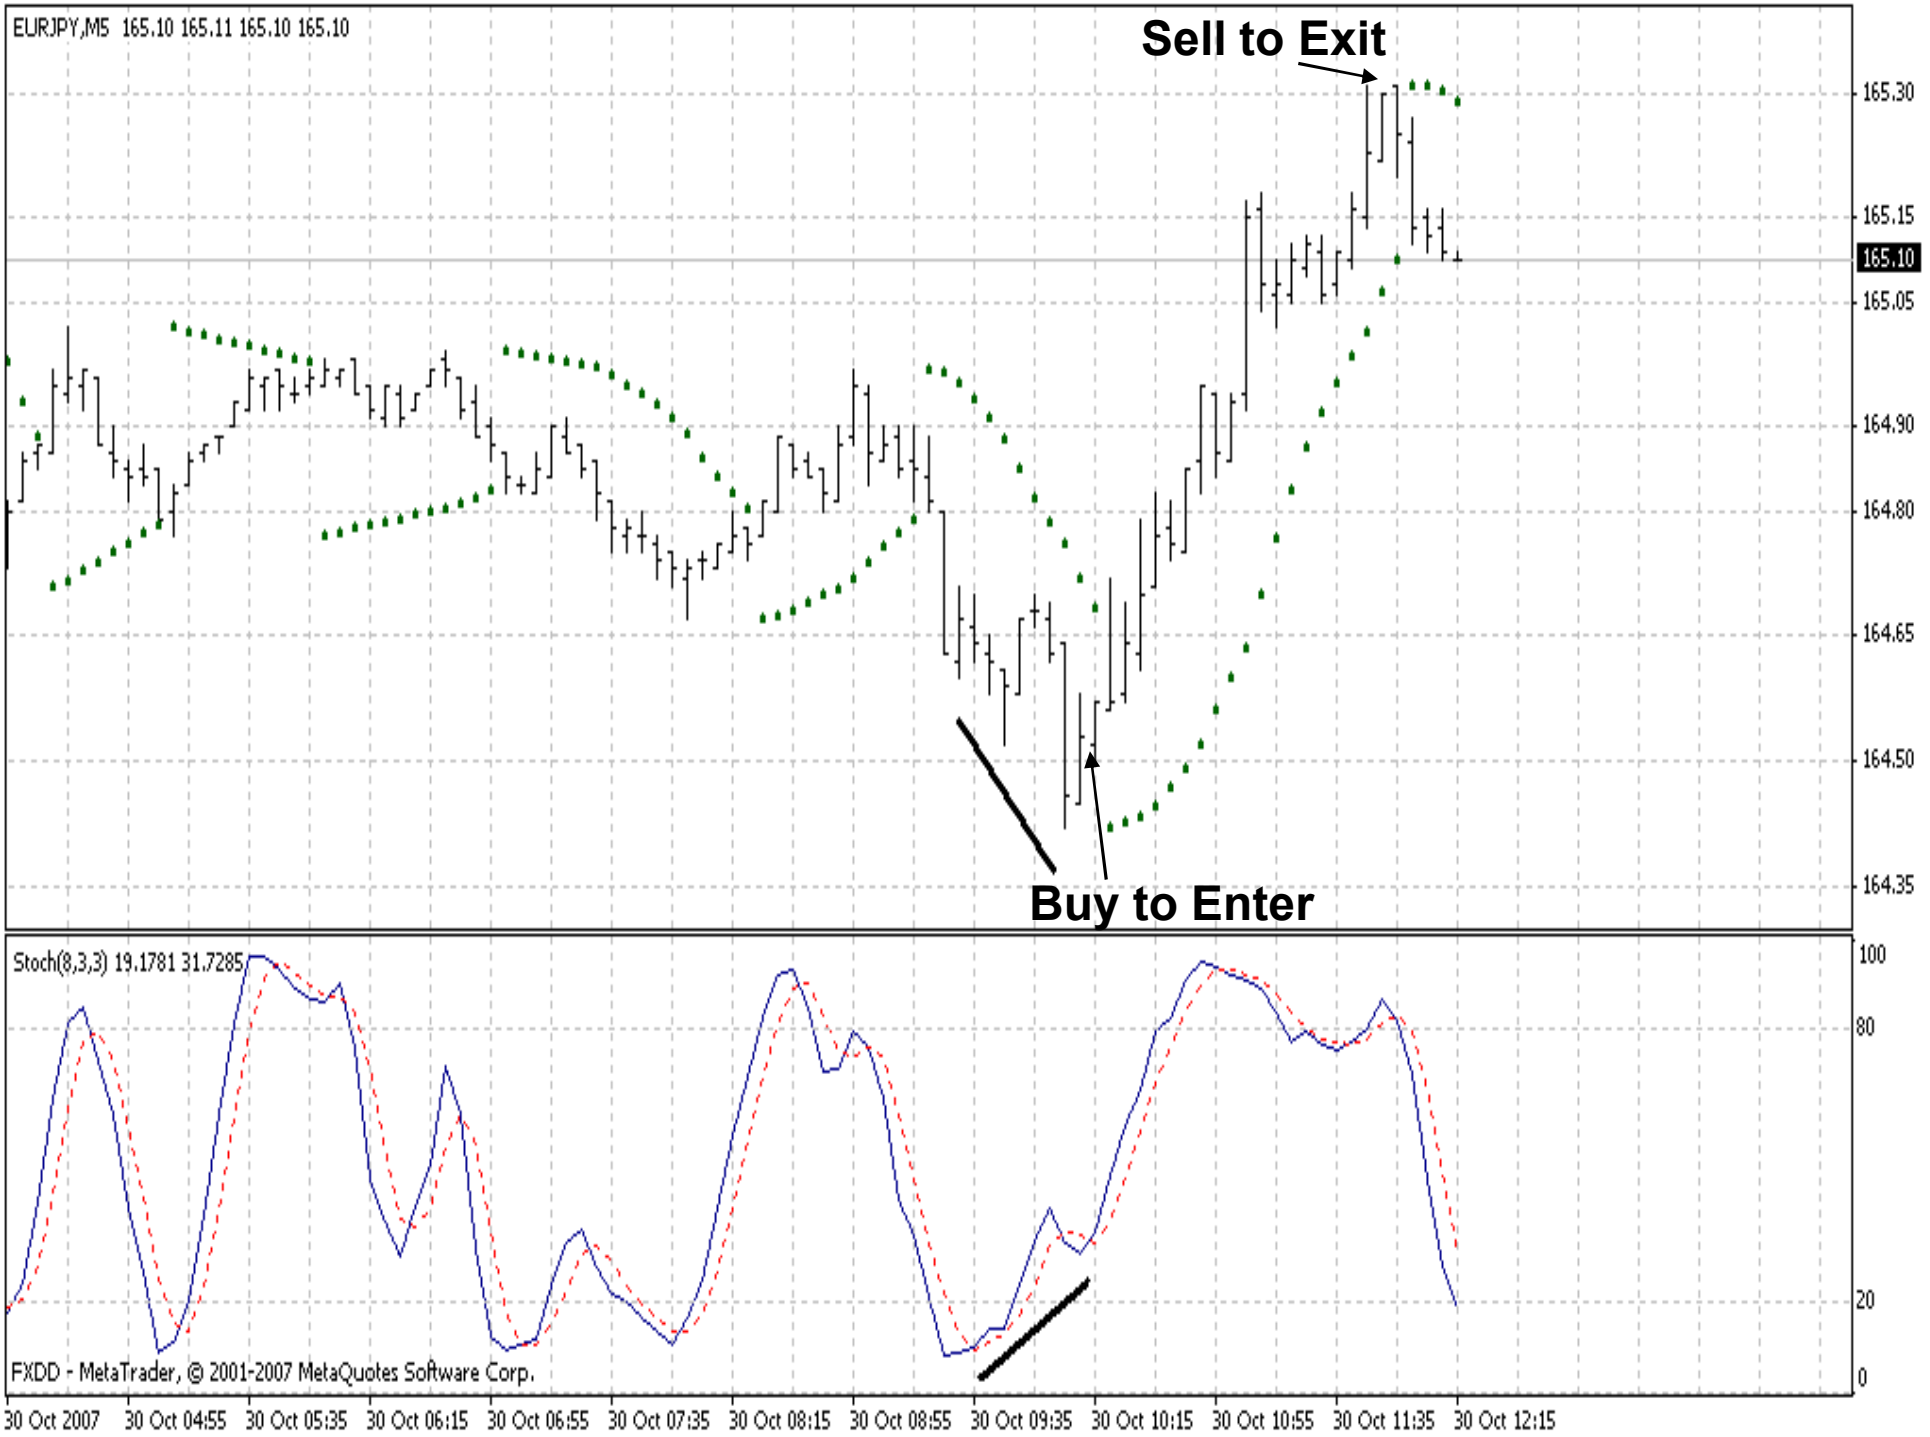

Pip Divergence

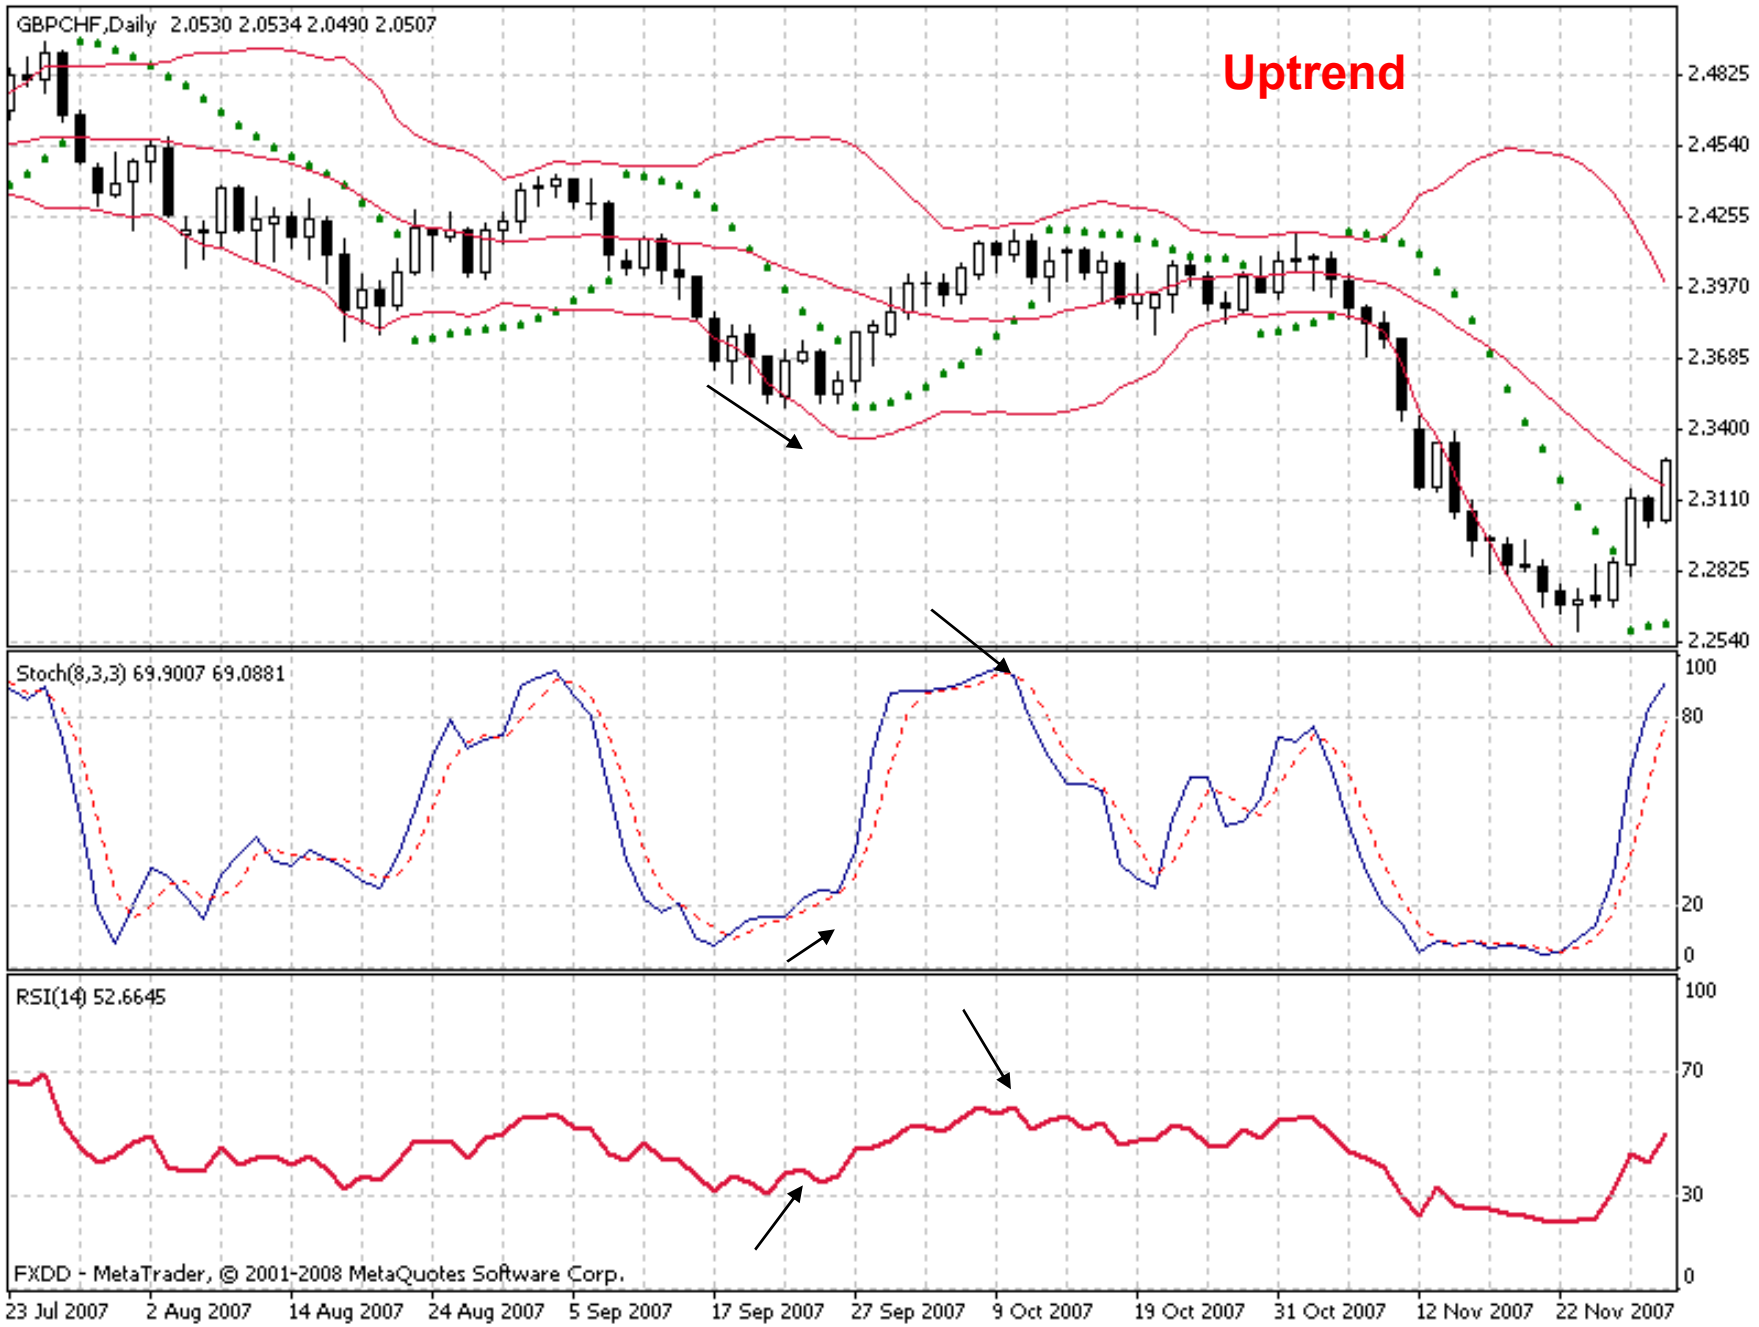

- A Divergence is basically the currency is going up but the stockastic is going down and vice versa. The price will eventually go in the direction of the stockhastic.
- Use Parabolic sar for timing entry and exit.
- Works with all time frame
- Stockhastic should preferably be either at support or resistence

Divergence

- Divergence is basically price action measured in relationship to an oscillator indicator. It doesn't really matter what type of oscillator you use. You can use RSI, Stochastic, MACD, etc. The great thing about divergences is that you can use them as a leading indicator.
- Since you are buying near the top or selling at the top, your trade risk is less.
- Divergence act as an early sign to tell you that the market could reverse.
- Divergences act as only an indicator not for entry or exit.It is not 100% foolproof!
- Use other indicators to confirm your findings.

Trading Non Farm Payroll 1st Friday of Each Month

- The Non Farm Payroll Report is released (generally) on the first Friday of the month at 8:30am Eastern US Time, and it contains information on the employment situation in the United States.

  A strong Non Farm Payroll number reflects a robust, growing economy.

  A weak number can mean that the economy is slowing down. The United States Federal Reserve considers this report an important influence on their monetary policy decisions. Because of this, the report is a major market mover, not only for currencies but also for stocks and bonds.

- <u>Two Trading Strategy (Works Best on Eur/USD, GBP/USD and USD/Yen)</u>

1) On the Day of Release FRIDAY (Use only 5 min chart)
2) End of Monday after it is release (Use Daily Chart)
